

THE JOURNAL OF HORTICULTURAL SCIENCE, VOL 56, 1981

SUBJECT INDEX

- Acer saccharinum*, propagation, 131
Amaranthus spp., diseases, Nigeria, 289
Anigozanthos spp. propagation, tissue culture, 181
 Apple, cultivars, Cox's Orange Pippin, 107, 145, 219, 345, 357
 cultivars, Discovery, 89, 219
 Egremont Russet, 219
 George Cave, 89
 Granny Smith, 71, 161, 323
 Laxton's Superb, 357
 Lord Lambourne, 357
 susceptibility, bark cracking, 373
 Tydeman's Early Worcester, 357
 Tydeman's Late Orange, 219
 Worcester Pearmain, 357
 blossoming, delay, frost resistance, 107
 bud development, evaporative cooling, 107
 disease resistance, inoculation time, 357
 rootstocks affect, 357
 diseases, *Phytophthora cactorum*, 357
 disorders, bark cracking, susceptibility, 373
 longitudinal bark cracking, 373
 evaporative cooling, effects, 107
 flower set, growth regulators, 345
 hormone application time, 345
 hormones, flower type, 345
 frost resistance, evaporative cooling, 107
 fruit drop, model, 41
 fruit set, model, 41
 fruit thinning, growth regulators, 89
 fruits, wound healing, 145
 growth, cropping, perennial patterns, 161
 grafting, wild species, 369
 leaf, phosphorus content, application methods, 255
 nutrition, foliar application, leaf composition, 255
 planting systems, spacing, 219
 pollination, model, 41
 propagation, cuttings, rooting, 301, 313
 graft compatibility, 369
 growth regulators, 15, 71
 root formation *in vitro*, 71
 quality, orchard locality, 323
 storage, 323
 rootstocks, disease resistance, 357
 M.9, 15
 spacing, planting systems, 219
 storage, DPA treatment, 323
 tree growth, irrigation, thinning, 161
 yield, irrigation, thinning, 161
 Avocado, enzymes, substrates, 285
 leaf, enzymes, substrates, 285
 Bean (*Vicia*), assimilate distribution, 55
 carbon economy, 55
 carbon transfer, stress, 155
 stress, carbon transfer, 155
 Beetroot, storage, 97
 Botrytis cinerea, raspberry, 193

Brussels sprouts, flowering, cold treatment, lighting, 271
 flowering, lighting, cold, 271
 lighting, cold treatment, 271

Cabbage, flowering, altitude, 185

 flowering, GA application, 185

Cacti, weed control, grasses, 189

Capsicums, storage, methods, 261

Carbon, reciprocal movement, *Vicia*, 155

Carrot, diseases, cultivar susceptibility, 95
 diseases, violet root rot, 95

Cashew, apple, composition, 177
 apple, vitamin C content, 177

Chaenomeles superba, nutrition, 125

Chamaecyparis lawsoniana, nutrition, 125

Cherry, propagation, interstocks, 237

 rootstocks, propagation, interstocks, 237

Chilling, propagation, plum, 1

Choanephora cucurbitarum, *Amaranthus*, 289

Cocoa, nutrition, foliar potassium, yield, 267

 yield, foliar applied potassium, 267

Cold treatment, lighting, flowering, brussels sprouts, 271

Composition, shrubs, normal and alkali soils, 169

Cooling, evaporative, apple bud development, 107

Corchorus olitorius, growth, temperature affects, 353

Cotton, fruit abscission, cytokinin level, 99

 fruit development, cytokinin level, 99

Cuttings, apple, cofactor activity, 301, 313

 hardwood, temperature, 131

Cytoplasmic variant, tomato, 65

Didymella applanata, raspberry, 193

Disease resistance, apple, collar rot, 357

Diseases, *Amaranthus* spp., Nigeria, 289

 screening for resistance, strawberry, 239

Dwarfing rootstocks, quince for pear, 139

Enzymes, peroxidase, substrates, 285

 polyphenol oxidase, substrates, 285

 substrates, avocado leaves, 285

Flower set, apple, growth regulators, 345

Fluid sowing, tomato, seed treatment, 207

Foliar nutrition, potassium, cocoa, 267

Frost resistance, evaporative cooling, apple, 107

Fruit drop, apple, model, 41

Fruit set, apple, model, 41

Fungicides, benomyl, 193

 raspberry diseases, 193

Grafting, saddle, mango, 173

Growth, *Corchorus olitorius*, temperature, 353

 pistachio, irrigation, salinity, 277

Growth regulators, apple, flower set, 345

 apple, fruit thinning, 89

 endogenous, guava, 339

 flowering, cabbage, kale, 185

 fruit development, abscission, cotton, 99

 fruit set, plum, 27

 compounds, carbaryl, 89

 cytokinins, 99

 DPU, 27, 345

 GA, 1, 27, 185, 339

 IBA, 15, 71, 301, 313

 M & B 25105, 89

 NAA, 27

- NOA, 71
- NOXA, 27, 345
- phloroglucinol, 15
- PP 528, 27
- 2, 4, 5-TP, 27
- propagation, apple, 15, 17
- plum, 1
- root-promoting substances, 295
- rooting, apple cuttings, 301, 313
- yield, plum, 27
- Guava, fruit, endogenous gibberellins, 339
- Helicobasidium purpureum*, carrot, 95
- Herbicides, difenopenten-ethyl, 189
- weed control, cacti, 189
- Hop, cultivars, Northern Brewer, 77, 81
- cultivars, OR 55, 81
- Target, 77
- WGV (1147), 81
- insecticide uptake, distribution, 77, 81
- pests, *Phorodon humuli*, 77, 81
- Iron chelates, quality, ornamental shrubs, 125
- shrubs on peat, 125
- Irrigation, apple growth, cropping, 161
- salinity, pistachio growth, 277
- Insecticides, mephosfolan, hop, 77, 81
- Interstocks, cherry rootstocks, 237
- Isozyme banding patterns, olive pollen, 377
- Kale, flowering, altitude, 185
- flowering, GA application, 185
- Kangaroo paws see *Anigozanthos* and *Macropidia* spp.
- Laburnum X vossii*, propagation, 131
- Lettuce, cultivar, Cobham Green, 9
- disorders, leaf size, 9
- tipburn, 9
- water loss, 9
- head characters, shading periods, 199
- head quality, temperature, 211
- hearting, shading periods, 199
- temperature effects, 211
- nutrition, Ca, 9
- shading, periods during growth, 199
- Lighting, cold treatments, flowering, brussels sprouts, 271
- Macropidia fuliginosa*, propagation, tissue culture, 181
- Mango, cultivar, Alphonso, 247
- disorders, internal breakdown, 247
- fruit, composition, internal breakdown, 247
- internal breakdown, chemical studies, 247
- propagation, saddle grafting, 173
- Models, mathematical, apple fruit, 41
- Mung bean cuttings test, bioassays, 295
- Nutrition, ornamentals, Fe deficiency, 125
- Obituary notice, F. R. Tubbs, 273
- Olive, cultivars, phenotypic variations, 377
- pollen, isozyme banding patterns, 377
- Onion, diseases, *Sclerotium cepivorum*, 251
- photosynthate, translocation, 113
- Orchard, planting systems, apple, 219
- locality, apple quality, 323
- Ornamental shrubs, compositions, alkaline soils, 169
- nutrition, Fe, 125
- peat-grown, nutrition, 125
- propagation, hardwood cuttings, 131

- Pear, cultivars, Conference, 139
 - cultivars, Doyenné Du Comice, 139
 - propagation, grafting, wild species, 369
 - graft compatibility, 369
- Pear, quince rootstocks, dwarfing, 139
- Peat, Fe deficiency, chelates, shrubs, 125
- Phenotypic variation, causes, 377
 - olive, 377
- Phloridzin, apple rooting cofactors, 313
- Phorodon humuli*, hop, 77, 81
- Phosphorus, foliar application, apple, 255
- Photosynthesis, assimilate distribution, onion, 113
 - photosynthate distribution, *Vicia*, 55
- Phytophthora cactorum*, 357
 - strawberry, 239
- Pistachio, growth, irrigation, salinity, 277
 - irrigation, salinity, growth, 277
 - salinity, irrigation, growth, 277
- Plum, cultivar, Victoria, 27
 - fruit set, growth regulators, 27
 - fruit size, growth regulators, 27
 - propagation, chilling, 1
 - growth regulators, 1
 - rootstock, Pixy, 1
 - thinning, fruit size, yield, 27
 - yield, growth regulators, 27
- Pollen, olive, isozyme banding patterns, 377
- Pollination, apple, model, 41
- Polyphenol oxidase, apple rooting cofactors, 313
- Potassium, foliar application, cocoa, 267
- Propagation, apple, 15
 - apple, root formation, 71
 - cuttings, rooting, apple, 301, 313
 - graft compatibility, apple, pear, 369
 - hardwood cuttings, ornamentals, 131
 - interstocks, cherry, 237
 - plum, 1
 - saddle grafting, mango, 173
 - tissue culture, kangaroo paws, 181
- Psophocarpus tetragonolobus*, see Winged bean
- Quality, apple, storage, orchard locality, 323
- Quince, rootstocks, dwarfing for pears, 139
- Raspberry, diseases, *Botrytis cinerea*, 193
 - diseases, *Didymella applanata*, 193
 - yield components, fungicides, 193
- Resistance, screening, strawberry diseases, 239
- Root-promoting substances, endogenous, apple, 301, 313
 - bioassay, 295
- Rootstocks, yield, quality, tea, 117
 - yield components, tea, 121
- Rose, cultivar, Samantha, 21
 - vase life, 21
- Salinity, irrigation, pistachio growth, 277
- Sclerotium cepivorum*, onion, 251
- Seedless fruit, gibberellins, guava, 339
- Shade, lettuce, hearting, head quality, 199
- Sphaerotheca macularis*, strawberry, 239
- Soils, alkaline, shrub composition, 169
- Storage, apple quality, 323
 - controlled atmosphere, capsicum, 261
 - disorders, beetroot, 97
 - hypobaric, capsicum, 261
 - methods, capsicum, 261
 - modified atmosphere, capsicum, 261
 - tomato, temperature, 363

- Strawberry, diseases, *Phytophthora cactorum*, 239
 - diseases, resistance, screening, 239
 - Sphaerotheca macularis*, 239
- Synergism, root-inducing cofactors, apple 301, 313
- Tea, quality, rootstock effect, 117
 - rootstock, yield, quality, 117
 - yield components, 121
 - yield, rootstock effect, 117
 - yield components, rootstock effect, 121
- Temperature, *Corchorus olitorius*, growth, 353
 - lettuce hearting, 211
 - seed treatment, tomato, 207
 - tomato, storage, 363
 - winged bean, 331
- Thinning, apple growth, cropping, 161
- Tissue culture, *Anigozanthos* spp., 181
 - Macropidia fuliginosa*, 181
- Tomato, cultivar, Sano, 65
 - disorders, cytoplasmic variant, 65
 - silvering, 65
 - planting, fluid sowing, 207
 - seed, emergence, growth, 207
 - seed treatments, emergence, growth, 207
 - low temperatures, 207
 - storage, temperatures, 363
- Tubbs, F. R., obituary notice, 273
- Vegetative propagation, grafting, apple, 369
 - grafting, pear, 369
- Vitamin C, cashew apple, 177
- Water stress, winged bean, growth, yield, 331
- Weed control, cacti, herbicides, 189
- Wild pome species, grafting, apple, pear, 369
- Winged bean, growth, yield, factors affecting, 331
 - temperature, growth, yield, 331
 - water stress, growth, yield, 331
- Wound healing, apple, fruit, 145
